

## **EMPLOYEE TRACKING SYSTEM**

Srinidhi Srinivasan, Saranya.S, Krithikaa Venket.V.S  
KCG college of Technology, Chennai

This project is basically software that allows the manager to monitor their employee's mobility using his/hers cell phone. The incoming, outgoing calls and even the SMS details can be monitored and stored in a centralized server. The SMS and the call alerts are sent to the manager when the employee operates his/her's cell phone.
