Nowadays the food habits followed by our people has changed a lot. As technology is moving towards several advancements, people consume the food for the sake of tastiness, without taking care of their health. This situation if continued, future generation people will suffer a lot. Traditional food items have several health benefits which has medicinal values in curing many diseases. Here the project deals with the creation of window on website to upload traditional food recipes for commercial development. Some of the traditional food items has the capability to increase the immunity power in our body, some food items have medicinal value to cure many diseases, which is more valuable than foreign medicine.
